Art Unit: 3714

DETAILED ACTION

Claim Objections

Claim 6 recites the limitation "NPC" in the body of the claims. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

Claims 31 and 33-34 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: Regarding claim 31, the prior art of record does not teach or suggest using a "trust-up event includes a player character subjecting itself to a medical examination, in a vicinity of a non-player character".

Regarding claim 33, the prior art of record does not teach or suggest a "non-player character reaction that includes being unable to perform a command from the player character when the trust state of the non-player character is below a predetermined level".

Regarding claim 34, the prior art of record does not teach or suggest wherein the "emotional state further includes a fear state, and wherein the non-player character reaction includes becoming unaffected by trust-influencing events upon reaching a threshold fear state".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Art Unit: 3714

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 and 36-37 are rejected under 35 U.S.C. 102(b) as being anticipated by the video game Fall Out 2 as evidenced by "Desslock: "Fall Out 2: game review" and "www.nma-fallout.com".

Regarding claims 1 and 37, Fall Out 2 discloses a method and a game program stored on a computer readable medium for controlling a non-player character in a computer game, that provides a squad of user-commandable characters, the squad including a player including a player character and at least one non-player character, the non-player character being commandable via the player character (see "Desslock"); detecting a predefined game event (see www.nma-fallout.com, 'character system'); and adjusting a current emotional state of the non-player character based on the game event (ie: different options and items can change the character settings and effect the different emotional traits of the characters)(see www.nma-fallout.com, 'traits', 'npcs', 'skills'). Additionally, Fall Out 2 discloses a method that allows for a selection of a non-player character reaction based on the current emotional state of a non-player character (ie: different non-player characters can have traits adjusted based on different game events)(see www.nma-fallout.com, 'npcs').

Regarding claim 36, Fall Out 2 discloses a computer game system for emotion-based character interaction, the system comprising a computer game program having a module configured to control movement for a squad of user-commandable characters, the squad including a player character and at least one non-player character, the non-player character being commandable via the player character (*see "Desselock"*). Additionally, Fall Out 2 discloses a non-player character module including: a game event detector configured to detect a predefined

Art Unit: 3714

game event (see www.nma-fallout.com, 'character system'); an emotional state adjustor configured to adjust a current emotional state of the non-player character based on the game event (see www.nma-fallout.com, 'traits', 'npcs', 'skills'); and a non-player character reaction selector configured to select a non-player character reaction based on a current emotional state of the non-player character (ie: the user is able to select the actions of the non-player character based on the characteristic traits of the non-player character)(see www.nma-fallout.com, 'npcs').

Regarding claim 2, Fall Out 2 discloses a method wherein movement of the player character is controlled by direct user input from a user input device, and movement of the non-player character is controlled by the computer game program (see "Desselock").

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fall Out 2 as evidenced by "Desslock: "Fall Out 2: game review" and "www.nma-fallout.com".

Regarding claims 10-14, Falls Out 2 discloses a role playing game that allows a user to incorporate a squad of user-commandable characters and a predefined game event that adjusts a current emotional state of a non-player character based on the game event. Additionally, the game allows a user to select a non-player character reaction based on the current emotional state

Art Unit: 3714

of the non-player character. Furthermore, Fall Out 2 implements a method that adjusts the characteristic traits of the characters and the non-player characters based on possession of weapons or ammunition that can cause an increase or decrease in the respective traits (see nma, 'basic traits', 'skills', 'karma' and 'npcs'). Fall Out 2 also incorporates medicine to adjust the traits of the player characters and a GUI indicator that present the user with current state of the different attributes and skills (see nma, 'Character Stats', 'Items'). However, although Fall Out 2 teaches several different types of emotional traits it fails to teach specifically a "fear state". These special 'traits' or 'states' symbolize different aspects of human behavior and emotion. They are based upon the same principles well known in the gaming arts of where different gaming events will effect these different skills or attributes (ie: health) and therefore can increase or decrease these traits in order to mimic attributes of the virtual players. The options available to a programmer are limitless however they are nonetheless the same from a technical perspective. As a result there is no patentable distinction from the weapons affecting strength or health or any other skill state. Therefore it would have been a simple matter of design choice and would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate any various types of traits such as a "fear state".

Claims 3-30, 32, and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fall Out 2 as applied to claims above, and further in view of **Shatterfield's Eternal**<u>Darkness: Sanity's Requiem</u> Review.

Regarding claims 3-9 and 15-17 and 19, Fall Out 2 teaches a game that incorporates a squad of player characters and non-player characters where different character traits may be

Art Unit: 3714

incorporated and selectively altered based upon different game events and items that are used by the different player characters. Furthermore, Fall Out 2 implements a method that adjusts the characteristic traits of the characters and the non-player characters based on possession of weapons or ammunition that can cause an increase or decrease in the respective traits (see nma, 'basic traits', 'skills', 'karma' and 'npcs'). Fall Out 2 also incorporates medicine to adjust the traits of the player characters and a GUI indicator that present the user with current state of the different attributes and skills (see nma, 'Character Stats', 'Items'). However, although Fall Out 2 teaches several different types of emotional traits it fails to teach specifically a "fear state". These special 'traits' or 'states' symbolize different aspects of human behavior and emotion. They are based upon the same principles well known in the gaming arts of where different gaming events will effect these different skills or attributes (ie: health) and therefore can increase or decrease these traits in order to mimic attributes of the virtual players. The options available to a programmer are limitless however they are nonetheless the same from a technical perspective. As a result there is no patentable distinction from the weapons affecting strength or health or any other skill state. Therefore it would have been a simple matter of design choice and would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate any various types of traits such as a "fear state". However, Fall Out 2 is silent with regard to how a fear state or emotional trait would be incorporated within a game when a player character is within proximity to a fear emitter or the different types of operations that are effected in the game when an emotional state is changed or effected by different game events.

Art Unit: 3714

In an analogous role playing game, Shatterfield teaches of a game known as "Eternal Darkness: Sanity's Requiem", herein referred to as "ED:SR". As taught by Shatterfield, Eternal Darkness incorporates a mental state or emotional state of the player character's that are affected by the events of the game. ED:SR teaches a fear state (ie: a sanity state) that adjusts in an increasing or reducing manner based on its proximity to a fear emitter or enemy (see Shatterfield). Furthermore, ED:SR implements different responses to commands when the fear state (ie: sanity state) reaches a predetermined level (ie: above a certain threshold state or below a threshold state) wherein a character reaction may include a self-destructive act or an act of incapacitation (see Shatterfield).

Regarding claims 18, 20-30, and 35, Fall Out 2 and ED:SR implement a method that adjusts the characteristic traits of the characters and the non-player characters based on possession of weapons or ammunition that can cause an increase or decrease in the respective traits (see nma, 'basic traits', 'skills', 'karma' and 'npcs'; Shatterfield). Fall Out 2 also incorporates medicine to adjust the traits of the player characters and a GUI indicator that present the user with current state of the different attributes and skills (see nma, 'Character Stats', 'Items' Shatterfield). However, although Fall Out 2 and ER:SR teach several different types of emotional traits it fails to teach specifically a "truth state". These special 'traits' or 'states' symbolize different aspects of human behavior and emotion. They are based upon the same principles well known in the gaming arts of where different gaming events will effect these different skills or attributes (ie: health, sanity state) and therefore can increase or decrease these traits in order to mimic attributes of the virtual players. Additionally, as mentioned previously the attributes that can be attributed to the state of these traits are mentioned above and

incorporated herein. Furthermore, ER:SR allows the state of these emotional states to affect the virtual mental state of the non-player characters and can have adverse effects within the virtual gaming world. The options available to a programmer are limitless however they are nonetheless the same from a technical perspective. As a result there is no patentable distinction from the sanity state or any other skill state. Therefore it would have been a simple matter of design choice and would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate any various types of traits such as a "truth state".

Regarding claim 32, Fall Out 2 discloses a method wherein an event includes a player character attacking a monster in a vicinity of a non-player character (see Desslock).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kikukawa et al. (US 6,780,112 B2) – Game Device in Which the Character Representation Changes Corresponding to the Value of a Multi-level input signal.

Miyake (US 6,732,146 B1) – Information Processing Apparatus Information Processing Method, and Information Providing Medium Providing a Changeable Virtual Space.

Mcquaid et al. (US 6,767,287 B1) – Computer System and Method for Implementing a Virtual Reality Environment for a Multi-Player Game.

Itou et al. (US 6,354,940 B1) – Game Apparatus, Game Fight Processing Method, and Computer Readable Storage Medium Storage Program Therefor.

Kudo (US 6,666,764 B1) – Method of Controlling a Character in a Video Game.
